

I listen to XM radio and recently purchased XM radio for my parents who live in a rural community where there are only a few radio stations and no cable television. I find it an egregious abuse of lobbying power to try and stifle competition. It would be tantamount to trying to stop local weather, news, etc. from being available on the internet! I urge the FCC to reject the NAB's petition 04-160.

Sincerely,

Stephen J. Fields
